## ABOUT THIS BROCHURE

This brochure introduces YourFortify, the cyber assurance and vulnerability improvement service from Your IT Department. It explains who the service is for, what is included, and how it's delivered and reviewed. For a tailored quote, please speak to your Your IT Department account contact.

# Why YourFortify

Certification proves a point in time. It doesn't prove ongoing improvement. YourFortify is the cyber assurance and vulnerability improvement service within the Your IT Department portfolio. It is designed for organisations that need to understand where they are exposed, achieve Cyber Essentials, monitor credential risk, test controls and demonstrate measurable progress over time.

This service does not cover managed detection and response, or Microsoft 365 security governance. See page 11 for where these are covered.

**Cyber Essentials is not the destination. It is the starting point.**

## A STRUCTURED IMPROVEMENT JOURNEY

Rather than a one-off tick-box exercise, YourFortify gives your business a repeatable cyber improvement programme, building assurance, closing gaps and proving progress quarter after quarter.

# Is this you?

YourFortify is designed for a specific type of organisation. If the descriptions below sound familiar, this service was built for you.

## Building your cyber foundation

You're a 10-50 user organisation beginning structured cyber improvement and seeking Cyber Essentials support.

## Needing higher assurance

You're a 30-100 user organisation that requires regular vulnerability scanning, testing and higher assurance.

## Wanting clearer visibility

You need visibility of vulnerabilities, dark web credential exposure and practical remediation guidance.

## Evidencing real improvement

Your leadership team wants clear evidence of cyber improvement, not just technical reports.

## TYPICAL BUYERS

Managing Director, Finance Director, Operations Director, Office Manager or business owner. Compliance Leads and IT Managers with cyber insurance or client assurance requirements are also typical buyers.

# Outcomes for your business

YourFortify is built around measurable business outcomes, not just technical delivery.

| Outcome                                  | What this means for your business                                                                        |
|------------------------------------------|----------------------------------------------------------------------------------------------------------|
| <b>Cyber Essentials confidence</b>       | You are supported through Cyber Essentials scope, gap analysis, readiness and certification preparation. |
| <b>Vulnerability visibility</b>          | You receive regular visibility of external vulnerabilities and prioritised risk reporting.               |
| <b>Credential exposure awareness</b>     | Domain and credential exposure is monitored so leaked credentials can be addressed.                      |
| <b>Prioritised remediation</b>           | Risk-based recommendations help you focus on what matters first.                                         |
| <b>Validated security improvement</b>    | Higher-assurance clients can validate controls through quarterly penetration testing.                    |
| <b>Executive risk visibility</b>         | Your leadership team receives plain-English summaries of risk, progress and improvement actions.         |
| <b>Structured cyber maturity journey</b> | You gain a repeatable improvement programme rather than a one-off tick-box exercise.                     |

# Choosing your tier

YourFortify is available in two core tiers, with Cyber Essentials Plus available as a separate add-on when certification support is needed beyond the core service.

| Tier                                | Best for                                                               | Primary outcome                                                                                                                 |
|-------------------------------------|------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------|
| <b>YourFortify Essential</b>        | 10-50 user organisations building their cyber foundation               | Achieve Cyber Essentials, monitor credential exposure and identify vulnerabilities before they become business risks.           |
| <b>YourFortify Plus</b>             | 30-100 user organisations needing ongoing testing and higher assurance | Continuously validate and improve cyber posture through vulnerability management, penetration testing and structured assurance. |
| <b>Cyber Essentials Plus Add-On</b> | Organisations requiring CE Plus certification support                  | Prepare for Cyber Essentials Plus with assessor coordination, evidence support and remediation planning.                        |

## CHOOSING THE RIGHT FIT

Not sure which tier fits your business? Your account contact can help you choose based on your user numbers and risk needs.

## FOUNDATION TIER

# YourFortify Essential

## Build the cyber foundation, achieve Cyber Essentials, gain visibility and fix key risks

Everything you need to build your cyber foundation: certification support, vulnerability scanning, dark web monitoring and guided remediation.

### Cyber Essentials certification support

- ✓ Cyber Essentials gap analysis
- ✓ Remediation guidance
- ✓ Audit preparation support
- ✓ Certification readiness review
- ✓ Scope validation assistance
- ✓ Annual certification coordination

### Vulnerability management

- ✓ Automated vulnerability scanning
- ✓ Monthly external vulnerability scans
- ✓ Prioritised risk reports
- ✓ Risk-based remediation recommendations
- ✓ Vulnerability trend reporting

### Dark web monitoring

- ✓ Domain monitoring
- ✓ Credential breach monitoring
- ✓ Exposure reporting
- ✓ Risk notification and recommended next actions

### Remediation allowance

- ✓ Up to 2 remediation hours per month
- ✓ Security-focused remediation support
- ✓ Cyber Essentials gap remediation guidance
- ✓ Vulnerability reduction activities

## ASSURANCE TIER

# YourFortify Plus

## Continuous assurance and validation through testing and specialist review

YourFortify Plus includes everything in Essential, plus the additional assurance components below for organisations that need ongoing testing and higher assurance.

### Quarterly penetration testing

- ✓ Quarterly testing using an approved penetration testing platform
- ✓ Internal and/or external testing of agreed targets
- ✓ Risk-ranked findings
- ✓ Testing summary and recommendations
- ✓ Trend visibility over repeated testing cycles

### Enhanced vulnerability assurance

- ✓ Continuous vulnerability validation
- ✓ Verification of remediation activity
- ✓ Risk verification
- ✓ Security trend analysis
- ✓ Prioritised improvement recommendations

### Enhanced remediation support

- ✓ Up to 4 remediation hours per month
- ✓ Vulnerability remediation support
- ✓ Risk reduction assistance
- ✓ Validation reviews
- ✓ Security improvement support

### Quarterly specialist security review

- ✓ Security posture review
- ✓ Vulnerability review
- ✓ Remediation planning
- ✓ Strategic recommendations
- ✓ Cyber improvement roadmap discussion

**CERTIFICATION ADD-ON**

# Cyber Essentials Plus add-on

Cyber Essentials Plus readiness is not included in YourFortify Essential or Plus. It is provided as a separate one-off add-on rather than a monthly service tier, keeping YourFortify simple while letting you purchase CE Plus support exactly when you need it.

**Included in the add-on**

- ✓ Cyber Essentials Plus readiness assessment
- ✓ Evidence gathering support
- ✓ Assessor coordination
- ✓ Test coordination
- ✓ Vulnerability verification review
- ✓ Remediation planning
- ✓ Certification preparation & management support

**Not included in the add-on**

- ✗ Certification fees unless explicitly included
- ✗ Auditor or assessor fees unless explicitly included
- ✗ Hardware replacement
- ✗ Major infrastructure remediation
- ✗ Large-scale remediation projects
- ✗ Third-party vendor professional services

# Customer success & quarterly reviews

YourFortify is reviewed through the Your IT 360 Framework. Reviews focus on vulnerabilities, assurance findings, remediation progress, Cyber Essentials status, credential exposure and security improvement priorities.

| Review area                 | Focus                                                            |
|-----------------------------|------------------------------------------------------------------|
| Vulnerabilities             | Are critical and high-risk issues reducing?                      |
| Cyber Essentials            | Is certification status clear and are controls being maintained? |
| Remediation progress        | Are agreed actions being completed?                              |
| Dark web risks              | Have any credentials or domains been exposed?                    |
| Penetration testing results | What weaknesses have been identified and validated?              |
| Security maturity           | Is the organisation becoming more resilient over time?           |
| Improvement roadmap         | What should be tackled next?                                     |

# Where YourFortify fits

YourFortify is focused on assurance, certification support and vulnerability management. Some related requirements are delivered through other parts of the Your IT Department portfolio.

| Requirement                       | Delivered by               |
|-----------------------------------|----------------------------|
| Microsoft 365 security governance | Your Secure 365            |
| Secure Score management           | Your Secure 365            |
| Conditional Access management     | Your Secure 365            |
| 24x7 threat monitoring            | Your Secure Defend         |
| Managed Detection and Response    | Your Secure Defend         |
| Incident response                 | Your Secure Defend         |
| Desktop and laptop patching       | Your Workplace             |
| Application deployment            | Your Workplace             |
| Infrastructure management         | Your Infrastructure        |
| Major remediation projects        | Separate statement of work |

# Investment

YourFortify is priced by programme rather than by user count, reflecting the tools, remediation allowance, review effort and assurance value delivered at each tier.

| Tier / Add-on                       | Price                 | Scope summary                                                                                                                                                                         |
|-------------------------------------|-----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>YourFortify Essential</b>        | £395/month            | Cyber Essentials support, monthly external vulnerability scanning, dark web monitoring, executive reporting and up to 2 remediation hours per month.                                  |
| <b>YourFortify Plus</b>             | £695/month            | Everything in Essential, plus quarterly penetration testing, enhanced vulnerability assurance, enhanced remediation support and specialist security review.                           |
| <b>Cyber Essentials Plus Add-On</b> | £1,495-£2,495 one-off | Readiness assessment, evidence support, assessor coordination and remediation planning. Certification and assessor fees are charged separately unless stated otherwise in your quote. |

Prices shown are standard published starting rates, exclusive of VAT. Larger or more complex environments may require custom pricing or separately scoped remediation projects. Your account contact can prepare a tailored quotation for your business.

# Ready to know where you're vulnerable?

A structured cyber assurance and vulnerability management programme for growing SMEs. Talk to us about bringing YourFortify into your business.

- ✓ Cyber Essentials certification support and readiness review
- ✓ Monthly external vulnerability scanning and dark web monitoring
- ✓ Quarterly penetration testing and enhanced assurance (Plus)
- ✓ Guided remediation support included every month
- ✓ Quarterly reviews through the Your IT 360 Framework
